Tree care contracting

Craig Treecare specialises in the care of individual and groups of trees.

We are knowledgeable about the needs of trees, and are trained and equipped to provide proper tree care.

We understand the importance of trees in our environment, and how if cared for properly, they can enhance our quality of life.

Services

Sectional felling and removal of dangerous trees

Tree and shrub pruning

Branch and limb removal

Dead wood removal

Stump grinding

Cabling and bracing

Lightning protection

Urban tree and hedge maintenance

Tree and shrub planting

Why Prune Trees?

The word crown refers to the canopy of the tree.

Crown cleaning—Removal of dead, diseased, broken or weakly attached branches from the crown of the tree.

Crown thinning—Removal of branches to increase light penetration and air movement through the crown and reduce weight.

Crown raising—Removal of lower branches of a tree in order to provide clearance for building, signs, vehicles and pedestrians.

Client satisfaction

We work with our clients in order to meet their expectations and guarantee their satisfaction by maintaining a high standard of work.

Safety

Climbing and working in trees has to be carried out by properly trained professionals operating in a safe and efficient manner. Craig Treecare has the expertise, training and experience that allows us to do this highly skilled job.
